

: Standard

simply powerful

Solid Standard is designed with the small cabinet manufacturer in mind. Solid Standard gives you the functionality required to take your business to the next step. Thinking about getting a low-cost Nesting CNC-Router? This is the ideal product to step up for the small cabinet manufacturer wanting more from their business.

Solid Standard is a mid-range design and manufacturing tool that allows you to detail all your cabinet jobs. Solid Standard automatically generates your factory drawings, produce 3D renders, material requirements, parts list and estimating data.

As a part of the Cabinet Vision range, Solid Standard is developed with the core functionality needed to help businesses. Solid Standard is easy to learn, has a wizard based setup, combined with the ability to design your own cabinetry and build your own library.

And as a part of the Cabinet Vision range, you've got options when it's time to add on additional features and functionality.

- Extensive design views & job information including floor plan, elevation, wire, photo rendering, job estimating, material & parts list.
- Quick & easy cabinet editing with openings, doors, drawers, shelving & divisions
- Create photo realistic renderings with shadows & reflections using Photo Vision
- Move with design trends:
 - door & drawer front style definition
 - straight, angled, curved, cathedral, vaulted and peninsula walls
 - display appliance, fixtures & fittings
- Create materials & custom moulding profiles
- Basic Job costings & Material Mark-ups
- Begin to advance with basic part shaping
- 32mm and Frame Overlay Construction
- Import Sketch-up® 3D Models
- Batch Process Multiple Jobs
- Import licensed Setup packages and User Custom Scripting
- Add on CNC functionality
