

# : Advanced

discover the potential of your business

Solid Advanced was designed with the mid-sized residential or commercial cabinet manufacturer in mind. Solid Advanced is designed to build on the features of Solid Standard, and give you greater flexibility and control.

Solid Advanced automatically generates your factory drawings, 3D photo realistic renderings, cut lists, material requirements, assembly sheets and estimating data.

Utilise split-screen designing; providing floor plan, elevation, perspective views & cabinet lists, all on one screen offering you visual validation during each process.

As a part of the Cabinet Vision range, Solid Advanced is developed with the core functionality needed to help businesses. Solid Advanced is easy to learn, has a wizard based setup, combined with the ability to design your own cabinetry and build your own library.

As part of the Cabinet Vision range, you've got options when it's time to add on additional features and functionality.

- Extensive design views & job information including floor plan , elevation , wire, photo rendering, job estimating, material & parts list
- Advanced Pricing & Quoting functionality, such as pricing by material and cabinet, as well as labour reports.
- Quick & easy cabinet editing with openings, doors, drawers, shelving & divisions
- Cabinet Shaping tools, cabinets can be curved or have cut-outs
- Create photo realistic renderings with shadows & reflections using Photo Vision
- Move with design trends:
  - door & drawer front style definition
  - curved, cathedral, vaulted, peninsula walls, layout t-walls (stub walls) and double sided walls
  - display appliance, fixtures & fittings
- Create part libraries
- Advanced CAD Functionality
- Import Sketch-up® Models & DXF files
- Complete control of all details of the cabinet hardware, materials, changing construction settings, door styles and more
- User Custom Scripting & Object Tree give you full control & customisation over your job
- Add on CNC functionality
