

# : Ultimate

engineer your product exactly as you need it

Solid Ultimate gives you a complete set of tools to engineer “your” product exactly as you need it.

Solid Ultimate enables any high-end joinery, woodworking or cabinetmaker to fully automate and integrate its design through manufacturing processes (screen to machine), saving time, eliminating costly mistakes and increasing productivity.

Design and detail all your jobs using advanced solid modelling technology. Solid Ultimate automatically generates your detailed drawings, 3D customer renderings, cutting lists, material requirements and estimating data.

As Cabinet Vision’s ultimate package, most of the add-on modules are already included, there are still options when it comes times to connect with machinery.

By adding S2M Center to Solid Ultimate, gain the additional benefits of Grain Matching, MDF Door Maker and Dovetail Drawers.

- Extensive design views & job information including floor plan , elevation, exploded view, photo rendering, job estimating, material & parts list
- Advanced Pricing & Quoting functionality, such as pricing by material and cabinet, as well as labour reports.
- Quick & easy cabinet editing with openings, doors, drawers, shelving & divisions
- Advanced cabinet shaping with the power of constraints
- Create photo realistic renderings with shadows & reflections using Photo Vision
- Move with design trends:
  - door & drawer front style definition
  - curved, cathedral, vaulted, peninsula walls, layout t-walls (stub walls) and double sided walls
  - display appliance, fixtures & fittings
- User defined intelli-joints gives parts greater intelligence
- Superior CAD Functionality
- Import Sketch-up® Models & DXF files
- Complete control of all details of the cabinet hardware, materials, changing construction settings, door styles and more
- User Custom Scripting & Object Tree give you full control & customisation over your job
- Add on CNC functionality
